- Specify 1/4" MEGANITE for "Wet-Wall" application in schools, health clubs, hospitals and homes.
- Does not promote the growth of mold, bacteria, mildew or fungus.
- Meets Class 1A fire retardant specifications.
- Use 1/4" MEGANITE sheets instead of ceramic tiles.
- Provides a solution for anti-bacterial application — up to 95% fewer seams making it a better choice for healthcare applications.
- Will not swell or delaminate when wet.
- Provides a smooth, non-porous surface that is easy to clean and reduces maintenance costs.
- More attractive — colors match 1/2" thick MEGANITE sheets.
- Faster and easier to install when compared to other products making it less expensive.
- Locally stocked, to meet those critical deadlines.
- Lower total cost than other "Wet-Wall" solutions.
